3 8 Slopes Of Parallel And Perpendicular Lines

Eventually, you will very discover a other experience and execution by spending more cash. still when? complete you say you will that you require to get those every needs later than having significantly cash? Why don't you attempt to get something basic in the beginning? That's something that will lead you to comprehend even more more or less the globe, experience, some places, considering history, amusement, and a lot more?

It is your enormously own get older to take action reviewing habit. along with guides you could enjoy now is 3 8 slopes of parallel and

Section 3.8 Slopes of Parallel and Perpendicular Lines . Warm Up p. 193 #1-4 . Objectives ' To identify the slopes of parallel & perpendicular lines ' To write the equations of parallel & perpendicular lines . Slopes of Parallel Lines: Key Concepts 1. If two nonvertical lines are parallel, then their

~~FALL in Love With Math~~

Parallel lines and their slopes are easy. Since slope is a measure of the angle of a line from the horizontal, and since parallel lines must have the same angle, then parallel lines have the same slope — and lines with the same slope are parallel. Perpendicular lines are a bit more complicated.

Practice

$y = 2x + 3$. Parallel lines have the same slope. The slope of the line with equation $y = 2x + 3$ is 2. So, any line parallel to $y = 2x + 3$ has the same slope 2. Now use the point-slope form to find the equation.
