Classicists have long wondered what everyday life was like in ancient Greece and Rome. How, for example, did the slaves, visitors, inhabitants or owners experience the same home differently? And how did owners manipulate the spaces of their homes to demonstrate control or social hierarchy? To answer these questions, Hannah Platts draws on a diverse range of evidence and an innovative amalgamation of methodological approaches to explore multisensory experience – auditory, olfactory, tactile, gustatory and visual – in domestic environments in Rome, Pompeii and Herculaneum for the first time, from the first century BCE to the second century CE. Moving between social registers and locations, from non-elite urban dwellings to lavish country villas, each chapter takes the reader through a different type of room and offers insights into the reasons, emotions and cultural factors behind perception, recording and control of bodily senses in the home, as well as their sociological implications. Multisensory Living in Ancient Rome will appeal to all students and researchers interested in Roman daily life and domestic architecture.

This volume is the second of the series Corollaria Crustumina aimed at the publication of conference proceedings, doctoral theses and specialist studies concerning the Latin settlement of Crustumerium (Rome) and Italian protohistory. It contains multidisciplinary papers of an international group of archaeologists discussing new fieldwork data and theories of broad relevance to Italian archaeology and with specific relevance to the study of Crustumerium's settlement, cemeteries and material culture in light of the site's cultural identity.

A New York Times Notable Book: A renowned scholar explores the way we eat across cultures and throughout history. From the wild parties of ancient Greece to the strictures of an Upper East Side meal to the ritualistic feasts of cannibals, Margaret Visser takes us on a fascinating journey through the diverse practices, customs, and taboos that define how and why we prepare and consume food the way we do. With keen insights into small details we take for granted, such as the origins of forks and chopsticks or why tablecloths exist, and examinations of broader issues like the economic implications of dining etiquette, Visser scrutinizes table manners across eras and oceans, offering an intimate new understanding of eating both as a biological necessity and a cultural phenomenon. Witty and impeccably researched, The Rituals of Dinner is a captivating blend of folklore, sociology, history, and humor. In the words of the New York Times Book Review, "Read it, because you will never look at a table knife the same way again."

Logistics have become a principle, if not a governing factor, in modern military operations. Armies need to be fed and supplied and the larger the army, the greater the logistical difficulties that have to be overcome. Two thousand years ago, when communications were far more primitive, the size of armies was limited by the difficulties of supply. It was because the Romans developed a sophisticated supply system that they were able to maintain large armies in the field – armies that conquered much of the then known world. In Caesar's Great Success: Sustaining the Roman Army on Campaign the authors examine and detail the world's first ever fully-developed logistical supply system – the forerunner of today's complex arrangements. This includes an examination of the sea, river and land transportation of food while on campaign, and of how the food was assembled at the operational bases and subsequently distributed. The defence of the Roman food supplies, and especially of lines of communication, was an important factor in Caesar's operational planning, as was interdicting the enemy's supplies. The eating habits of Caesar's men are considered and what items could be obtained locally by forage and which were taken by requisition – and how much food a legionnaire was expected to carry on campaign. With this, the nature of the actual food consumed by the legionnaires is therefore examined and sample recipes are provided with each chapter of the book to enable the reader to relive those momentous days when Caesar and Rome ruled the world.
