The book covers less mathematics than a  
typical text on applied linear algebra. We  
use only one theoretical concept from linear  
algebra, linear independence, and only one  
computational tool, the QR factorization; our

goal of imparting technique alongside contextual understanding. Applications go hand-in-hand with theory, each reinforcing and explaining the other. This approach encourages students to develop not only the technical proficiency needed to go on to further study, but an appreciation for when, why, and how the tools of linear algebra can be used across modern applied mathematics.
