Marco Armiero is Senior Researcher at the Italian National Research Council and Marie Curie Fellow at the Institute of Environmental Sciences and Technologies, Universitat Aut(noma de Barcelona. He has published extensively on-Italian environmental history and edited Views from the South: Environmental Stories from the Mediterranean World. --

A classic in France, this moving first-person story can be read as a fictional account, as well as the best kind of material for historians of 19th-century French peasant life.

"One of the most entertaining short narratives of all time, the Achilleid is a stand-alone work of compelling contemporary interest that moves with great rapidity and clarity. Its compact narrative, which encompasses a brutish childhood, an overprotective mother, temporary gender bending, sexual violence, and a final coming to manhood with the promise of future military prowess, may be unparalleled in a single narrative of such brevity. The text has survived in hundreds of manuscripts, sometimes copied with Statius' much longer and lugubrious Thebaid, but just as often with other racy short narratives and dramas taught in the medieval schools. The poem's literary playfulness, visual imagery, and lighthearted treatment of mythological and historical data made it--and can still make it--a goldmine in the classroom. Until now, however, it has been virtually impossible to get a sense of the work if one did not know Latin--recent translations notwithstanding. Stanley Lombardo's translation of the Achilleid is a dream: it's sound, enthralling, and will fully engage readers with this enticing, perplexing, at times distressing, but ultimately rewarding work." --Marjorie Curry Woods, Blumberg Centennial Professor of English and University Distinguished Teaching Professor, The University of Texas at Austin

International Environmental Law offers a concise, conceptually clear, and legally rigorous introduction to contemporary international environmental law and practice. The book covers all major environmental agreements, paying particular attention to their underlying structure, main legal provisions, and practical operation. It blends legal and policy analysis, making extensive reference to the jurisprudence and scholarship, and addressing the interconnections with other areas of international law, including human rights, humanitarian law, trade and foreign investment. The material is structured into four sections - foundations, substantive regulation, implementation, and influence on other areas of international law - which help the reader to navigate the different areas of international environmental law. Each chapter includes charts summarising the main components of the relevant legal frameworks and provides a detailed bibliography. Suitable for practicing and academic international lawyers who want an accessible, up-to-date introduction to contemporary international environmental law, as well as non-lawyers seeking a concise and clear understanding of the subject.
