Mix Lavori agricoli 2018 by Trento993**Lavori Agricoli 2011**

This text provides an important overview of the contributions of edible insects to ecological sustainability, livelihoods, nutrition and health, food culture and food systems around the world. While insect farming for both food and feed is rapidly increasing in popularity around the world, the role that wild insect species have played in the lives and societies of millions of people worldwide cannot be ignored. In order to represent this diversity, this work draws upon research conducted in a wide range of geographical locations and features a variety of different insect species. Edible insects in Sustainable

Food Systems comprehensively covers the basic principles of entomology and population dynamics; edible insects and culture; nutrition and health; gastronomy; insects as animal feed; factors influencing preferences and acceptability of insects; environmental impacts and conservation; considerations for insect farming and policy and legislation. The book contains practical information for researchers, NGOs and international organizations, decision-makers, entrepreneurs and students.

In *Socialism of Fools*, Michele Battini focuses on the critical moment during the Enlightenment in which anti-Jewish stereotypes morphed into a sophisticated, modern social anti-Semitism. He recovers the potent anti-Jewish, anticapitalist propaganda that cemented the idea of a Jewish conspiracy in the European mind and connects it to the atrocities that characterized the Jewish experience in the nineteenth and twentieth centuries. Beginning in the eighteenth century, counter-Enlightenment intellectuals and intransigent Catholic writers singled out Jews for conspiring to exploit self-sustaining markets and the liberal state. These ideas spread among socialist and labor movements in the nineteenth century and intensified during the Long Depression of the 1870s. Anti-Jewish anticapitalism then migrated to the Habsburg Empire with the Christian Social Party; to Germany with the Anti-Semitic Leagues; to France with the nationalist movements; and to Italy, where Revolutionary Syndicalists made anti-Jewish anticapitalism the basis of an alliance with the nationalists. Exemplified best in the *Protocols of the Elders of Zion*, the infamous document that "leaked" Jewish plans to conquer the world, the Jewish-conspiracy myth inverts reality and creates a perverse relationship to historical and judicial truth. Isolating the intellectual roots of this phenomenon and its contemporary resonances, Battini shows us why, so many decades after the Holocaust, Jewish people continue to be a powerful political target.

A cura della Flai Cgil, il più completo rapporto per analizzare l'infiltrazione della criminalità nel comparto agroalimentare italiano. Un osservatorio a 360° per avere il quadro più esaustivo possibile su uno dei settori più importanti della nostra economia

The book reflects on the issues concerning, on the one hand, the difficulty in feeding an ever-increasing world population and, on the other hand, the need to build new productive systems able to protect the planet from overexploitation. The concept of “food diversity” is a synthesis of diversities: biodiversity of ecological sources of food supply; socio-territorial diversity; and cultural diversity of food traditions. In keeping with this transdisciplinary perspective, the book collects a large number of contributions that examine, firstly the relationships between agrobiodiversity, rural sustainable systems and food diversity; and secondly, the issues concerning typicality (food specialties/food identities), rural development and territorial communities. Lastly, it explores legal questions concerning the regulations aiming to protect both the food diversity and the right to food, in the light of the political, economic and social implications related to the problem of feeding the world population, while at the same time respecting local communities’ rights, especially in the developing countries. The book collects the works of legal scholars, agroecologists, historians and sociologists from around the globe.

This book was born from the desire to analyze the role of social recruitment in human resources management. The first chapter analyzes theoretical background of social media communication and focuses on the trend to make use of these instruments in SMEs and public and non-profit sectors. The

second chapter explores an analysis of social sphere through three perspectives: a) how it has changed the identity of individuals; b) the relationship between social media and aspects of personality; c) the correlation between social media and cultural dimensions. The third chapter, focuses on the advantages and limitations of social recruitment and examines how employer branding can be used strategically in order to attract potential candidates. The relationship between social network and recruitment has been analyzed through empirical research on public and non-profit sector and SMEs (using Cranet data) in the fourth chapter. The last chapter analyzes the competitive advantage which social recruitment can generate

Food - its cultivation, preparation and communal consumption - has long been considered a form of cultural heritage. A dynamic, living product, food creates social bonds as it simultaneously marks off and maintains cultural difference. In bringing together anthropologists, historians and other scholars of food and heritage, this volume closely examines the ways in which the cultivation, preparation, and consumption of food is used to create identity claims of 'cultural heritage' on local, regional, national and international scales. Contributors explore a range of themes, including how food is used to mark insiders and outsiders within an ethnic group; how the same food's meanings change within a particular society based on class, gender or taste; and how traditions are 'invented' for the revitalization of a community during periods of cultural pressure. Featuring case studies from Europe, Asia and the Americas, this

timely volume also addresses the complex processes of classifying, designating, and valorizing food as 'terroir,' 'slow food,' or as intangible cultural heritage through UNESCO. By effectively analyzing food and foodways through the perspectives of critical heritage studies, this collection productively brings two overlapping but frequently separate theoretical frameworks into conversation.
