CIRIA guidance. The majority of our research activities result in best practice publications, many of which have been adopted as the standard for excellence in their respective areas. The following civil and infrastructure publications include sustainable whole-life infrastructure asset design and management, and technical guidance on the management of key assets such as bridges, tunnels, embankments, dams, culverts and reservoirs.

CIRIA guidance
CIRIA guidance CIRIA has produced a number of guidance documents covering a range of opportunities and challenges related to general water management, all the way through to specific SuDS components. The more notable publications are CIRIA C753 The SuDS Manual and CIRIA C713 Retrofitting for surface water management.

CIRIA guidance - Sustainable Drainage System
This guide addresses intrusive inspections beneath the anchor head, typically the critical section in respect of corrosion, outlines specialist techniques such as destructive de-stress and describes options for remediation and repair. Special offer ends 30 September. Click here to order a copy.
