"Zapping", (which is a real misnomer), or electrolytic cleaning has been hailed as a cure for bronze disease, at least in coins. This supposedly takes one session, which does not damage the patina. This is what I have gleaned, but it wouldn't be the first time I done ate my foot on this a here list.

~~Antiquities-Cleaning, Restoring and Conservation~~

And said purpose is to clean coins in order to: 1. Remove most or all encrustations on the coin so that the original designs and legends are visible again, if they are still there, and always without damaging the patina or the metal, and 2. Conserve the coin so that the decaying processes are reduced as much as possible, thus
