Angelo Parrano's great passion? Cooking his family's Italian cuisine in the heart of Seattle's Pike Place Market. His success definitely leaves no time for a personal life. Jo Thompson escaped small-town Alaska by applying her brains and sheer force of will. Now a top-notch corporate lawyer in Seattle, her life plan runs right on track. The myth of cozy family? Not on her schedule. From the very first moment, they both must confront the place in their hearts Where Dreams Reside.

This series contains the decisions of the Court in both the English and French texts.

No one understands the "Make America Great Again" effort with more insight and more experience than former Speaker of the House Newt Gingrich. Gingrich was an ally of President Ronald Reagan during his 1980 "Let's Make America Great Again" campaign. In 1994, Newt was the architect of the Contract with America and the campaign that ended 40 years of Democratic control in the House of Representatives. As a friend and supporter of President Donald Trump, Gingrich authored the #1 New York Times bestseller Understanding Trump, which explained the 2016 election and the early Trump presidency in ways no one else could. In Trump's America: The Truth About Our Nation's Great Comeback, Gingrich describes our country's tremendous turnaround under President Donald Trump's leadership - and confronts the desperate efforts by the elites in academia, the media, and the Washington establishment to undermine and distort his achievements. The Americans who elected President Trump expect him to make good on his iconic call to "Make America Great Again." So far, he is making good on his promise. The swamp is being drained, the judiciary is being restored, the economy is growing rapidly, unemployment is in decline, and America's strength and standing as the world's dominant super power is improving daily. Meanwhile, Trump's opponents in Washington and the media are lashing out because they can't stand the fact that the President they deeply oppose is succeeding. Gingrich understands the challenges faced by the White House staff, the role fake news plays in modern politics, and the ropes of legislative infighting in Congress. Trump's America tells the truth that the elites in the media and Washington don't want you to know.

If we lived in a liquid world, the concept of a "machine" would make no sense. Liquid life is metaphor and apparatus that discusses the consequences of thinking, working, and living through liquids. It is an irreducible, paradoxical, parallel, planetary-scale material condition, unevenly distributed spatially, but temporally continuous. It is what remains when logical explanations can no longer account for the experiences that we recognize as part of "being alive." Liquid life references a third-millennial understanding of matter that seeks to restore the agency of the liquid soul for an ecological era, which has been banished by reductionist, "brute" materialist discourses and mechanical models of life. Offering an alternative worldview of the living realm through a "new materialist" and "liquid" study of matter, it conjures forth examples of creatures that do not obey mechanistic concepts like predictability, efficiency, and rationality. With the advent of molecular science, an increasingly persuasive ontology of liquid technologies can be identified. Through the lens of lifelike dynamic droplets, the agency for these systems exists at the interfaces between different fields of matter/energy that respond to highly local effects, with no need for a central organizing system. Liquid Life seeks an alternative partnership between humanity and the natural world. It provokes a re-invention of the languages of the living realm to open up alternative spaces for exploration: Rolf Hughes' "angelology" of language explores the transformative invocations of prose poetry, and Simone Ferracina's graphical notations help shape our concepts of metabolism, upcycling, and designing with fluids. A conceptual and practical toolset for thinking and designing, Liquid Life reunites us with the irreducible "soul substance" of living things, which will neither be simply "solved," nor go away. Rachel Armstrong is Professor of Experimental Architecture at Newcastle University (UK), and has also been a Rising Waters II Fellow for the Robert Rauschenberg Foundation (April-May 2016), TWOTY futurist in 2015, Fellow of the British Interplanetary Society, and a Senior TED Fellow in 2010. She is also the coordinator of the Living Architecture project, an EU-funded project that establishes the principles for our buildings to share some of the properties of living things, e.g. metabolism, operating at the intersection of architecture, building construction, bio-energy and synthetic biology. She is also the author of Vibrant

Architecture (De Gruyter, 2015), Star Ark: A Living, Self-Sustaining Spaceship (Springer, 2017), and Soft Living Architecture: An Alternative View of Bio-informed Design Practice (Bloomsbury, 2018).

The Fifth Edition of the highly praised Practical Guide for Medical Teachers provides a bridge between the theoretical aspects of medical education and the delivery of enthusiastic and effective teaching in basic science and clinical medicine. Healthcare professionals are committed teachers and this book is an essential guide to help them maximise their performance. This highly regarded book recognises the importance of educational skills in the delivery of quality teaching in medicine. The contents offer valuable insights into all important aspects of medical education today. A leading educationalist from the USA joins the book's editorial team. The continual emergence of new topics is recognised in this new edition with nine new chapters: The role of patients as teachers and assessors; Medical humanities; Decision-making; Alternative medicine; Global awareness; Education at a time of ubiquitous information; Programmatic assessment; Student engagement; and Social accountability. An enlarged group of authors from more than 15 countries provides both an international perspective and a multi-professional approach to topics of interest to all healthcare teachers.

Explores how and to what extent Londoners negotiated and repaired these open wounds. This book introduces us to shopkeepers and prostitutes, men and women of fashion and genius, street-robbers and thief-takers, as they play out the astonishing drama of life in eighteenth-century London.

Our intention in this collection is to provide, largely through original writings, an extended account of pi from the dawn of mathematical time to the present. The story of pi reflects the most seminal, the most serious, and sometimes the most whimsical aspects of mathematics. A surprising amount of the most important mathematics and a significant number of the most important mathematicians have contributed to its unfolding directly or otherwise. Pi is one of the few mathematical concepts whose mention evokes a response of recognition and interest in those not concerned professionally with the subject. It has been a part of human culture and the educated imagination for more than twenty-five hundred years. The computation of pi is virtually the only topic from the most ancient stratum of mathematics that is still of serious interest to modern mathematical research. To pursue this topic as it developed throughout the millennia is to follow a thread through the history of mathematics that winds through geometry, analysis and special functions, numerical analysis, algebra, and number theory. It offers a subject that provides mathematicians with examples of many current mathematical techniques as well as a palpable sense of their historical development. Why a Source Book? Few books serve wider potential audiences than does a source book. To our knowledge, there is at present no easy access to the bulk of the material we have collected.

This book investigates nominal determination in Old English and the emergence of the definite and the indefinite article. Analyzing Old English prose texts, it discusses the nature of linguistic categorization and argues that a usage-based, cognitive, constructionalist approach best explains when, how and why the article category developed. It is shown that the development of the OE demonstrative 'se' (that) and the OE numeral 'an' (one) should not be told as a story of two individual, grammaticalizing morphemes, but must be reconceptualized in constructional terms. The emergence of the morphological category 'article' follows from constructional changes in the linguistic networks of OE speakers and especially from 'grammatical constructionalization' (i.e. the emergence of a new, schematic, mostly procedural form-meaning pairing which previously did not exist in the construction). Next to other functional-cognitive reasons, the book especially highlights analogy and frequency effects as driving forces of linguistic change.

An illustrated, comprehensive guide to surviving an attack by hordes of the predatory undead explains zombie physiology and behavior, the most effective weaponry and defense strategies, how to outfit one's home for a long siege, and how to survive in any territory or terrain. Original. 35,000 first printing.
