Climatology or climate science is the scientific study of climate, scientifically defined as weather conditions averaged over a period of time. This modern field of

## Read Free Contemporary Climatology

study is regarded as a branch of the atmospheric sciences and a subfield of physical geography, which is one of the Earth sciences. Climatology now includes aspects of oceanography and biogeochemistry. The main methods employed by climatologists are the analysis of observations and modelling the physical laws that determine the clima

### **Climatology - Wikipedia**

Climatology, the study of climate, is no longer regarded as a single discipline that treats climate as something that fluctuates only within the unchanging boundaries described by historical statistics. The field has recognized that climate is something that
