Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to

advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

While the diffusion of modernity and the spread of development schemes may bring prosperity, optimism and opportunity for some, for others it has brought poverty, a deterioration in quality of life and has given rise to violence. This collection brings an anthropological perspective to bear on understanding the diverse modernities we face in the contemporary world. It provides a critical review of interpretations of development and modernity, supported by rigorous case studies from regions as diverse as Guatemala, Sri Lanka, West Africa and contemporary Europe. Together, the chapters in this volume demonstrate the crucial importance of looking to ethnography for guidance in shaping development policies. Ethnography can show how people's own agency transforms, recasts and complicates the modernities they experience. The contributors argue that explanations of change framed in terms of the dominant discourses and institutions of modernity are inadequate, and that we give closer attention to discourses, images, beliefs and practices that run counter to these yet play a part in shaping them and giving them meaning. Anthropology, Development and Modernities deals with the realities of people's everyday lives and dilemmas. It is essential reading for students and scholars in anthropology, sociology and development studies. It should also be read by all those actively involved in development work.

The purpose of the 'Microfinance Handbook' is to bring together in a single source guiding principles and tools that will promote sustainable microfinance and create viable institutions.

Can the stories people tell influence the way they see the world? This book seeks to address that question through a study of the viability of movie making as a critical pedagogy activity. Positioned at the intersection of education and communication for social change, it explores the relationship between the generation of subjective knowledge through storytelling and analysis, and systemic change. Central to the book is a case study from Nepal. By using video as the action element and analytical material of coursework, youth participants generated a new critical awareness, engendered by themes arising from group discussion. Through the analysis of these themes participants initiated an emergence known as conscientization. Led by two critical educators, participants used the production, screening, and analysis of their own movies to propel the course, or praxis, forward. This book seeks to inform the practice

of critical pedagogy both practically and theoretically, and also offers a contribution to the fields of participatory action-research and communication for social change.

Throughout history, Basque men and women have made contributions in navigation, education, science, fashion, politics, and many other fields. Too often these achievements have been overlooked, or have been claimed as the accomplishments of others. *Basque Firsts: People Who Changed the World* profiles seven remarkable Basques who were the first in their fields to do something--something extraordinary--that had a dramatic impact on others who followed them. The profiles use primary sources to tell fresh stories and offer a wonderful variety, showing the astonishing breadth of Basque contributions. They include Juan Sebastián Elcano, the first person to circumnavigate the earth; St. Ignatius of Loyola, the first Jesuit to seed a worldwide movement in education; Santiago Ramón y Cajal, the Father of Neurology and a Nobel laureate; Cristóbal Balenciaga, the king of haute couture; Paul Laxalt, one of Ronald Reagan's closest friends in politics; and Edurne Pasaban, the first woman to climb the world's fourteen tallest mountains. *Basque Firsts* provides a rare look at a culture's people, revealing the significant contributions they have shared.
