Responding to recent reform efforts, such as the Next Generation Science Standards, which call for students to learn science practices, this book proposes a conceptual reframing of the roles of teachers and students in formal and informal science learning settings. Inviting the field to examine the state of "science practice," it provides concrete examples of how students, supported by the actions of educators, take on new roles, shifting from passive recipients of information to active participants in conceptual, social, epistemic, and material features of science work. Each chapter provides an examination of how and why science practice evolves in learning communities in which students and teachers negotiate disciplinary work; an analysis of how specific pedagogical and social actions taken by someone with authority (a teacher or other educator) provides opportunities for students to shape science practices; a set

of concrete recommendations for working with young students in formal and informal learning settings; and a set of suggestions and questions to catalyze future research about and the evolving relationships between educators, students, and science practices in the field of science education. Showing how and why the conceptual ideas presented are important, and providing specific, actionable suggestions for teachers and other educators for their daily work, this book includes both elementary and secondary learning sites.

This book constitutes the proceedings of the 13th European Conference on Technology Enhanced Learning, EC-TEL 2018, held in Leeds, UK, in September 2018. The 42 full and short papers, 7 demo papers, and 23 poster papers presented in this volume were carefully reviewed and selected from 142 submissions. This year, the European Conference on Technology-Enhanced Learning (EC-TEL) will engage researchers, practitioners, educational developers, entrepreneurs and policy makers in a joint discussion on how to put science, technology and practice at the service of learning to embrace these challenges on the topic: Lifelong technology enhanced learning: Dealing with the complexity of 21st century challenges. /div Chapter "" is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.

Concepts such as dependability/generalization and inferences are dealt with implicitly or explicitly in any research undertaken in applied linguistics. This volume provides a well-

balanced and cross-disciplinary perspective on how researchers conceptualize inferences about learner acquisition and performances as well as dependability and generalizability of findings. The book is a collection of chapters by prominent researchers in applied linguistics, working in diverse domains such as vocabulary, syntax, discourse analysis, SLA, and language testing. The goal of the book is to bring attention to these issues, which underpin much of applied linguistics research and to highlight what is considered good practice so as to buttress confidence in the research claims made. The book represents current thinking on fundamental research concepts in applied linguistics and can be used as a textbook in courses on research methodology in applied linguistics. The book is also an excellent source of in-depth analysis of research conceptualization for applied linguistics researchers and graduate students.

How can you establish a customer-centric culture in an organization? This is the first comprehensive book on how to actually do service design to improve the quality and the interaction between service providers and customers. You'll learn specific facilitation guidelines on how to run workshops, perform all of the main service design methods, implement concepts in reality, and embed service design successfully in an organization. Great customer experience needs a common language across disciplines to break down silos within an organization. This book provides a consistent model for accomplishing this and offers hands-on descriptions of every single step, tool, and method used. You'll be able to focus on your customers and iteratively improve their experience. Move from theory to practice and build sustainable business success.
