This book represents the first multi-disciplinary introduction to the study of war crimes trials and investigations. It introduces readers to the numerous disciplines engaged with this complex subject, including: Forensic Anthropology, Economics and Anthropometrics, Legal History, Violence Studies, International Criminal Justice, International Relations, and Moral Philosophy. The contributors are experts in their respective fields and the chapters highlight each discipline’s major trends, debates, methods and approaches to mass atrocity, genocide, and crimes against humanity, as well as their interactions with adjacent disciplines. Case studies illustrate how the respective disciplines work in practice, including examples from the Allied Hunger Blockade, WWII, the Guatemalan and Spanish Civil Wars, the Former Yugoslavia, and Uganda. Including bibliographical essays to offer readers crucial orientation when approaching the specialist literature in each case, this edited collection equips readers with what they need to know in order to navigate a complex, and until now, deeply fragmented field. A diverse and interdisciplinary body of research, this book will be indispensable reading for scholars of war crimes.

Aspects of political culture, i.e. concerns with the 'subjective' dimension of politics including dominant political orientations, perceptions and interpretations, always have been particularly relevant with regard to the case of Germany and its great variety of political regimes during the last century. This is true both with regard to political science and practical politics. This volume provides a comprehensive overview concerning the major historical legacies, regional and sub-cultural variations, and current problems of democratic orientations, national identity and relationships to the outside world.

Fascism exerted a crucial ideological and political influence across Europe and beyond. Its appeal reached much further than the expanding transnational circle of 'fascists', crossing into the territory of the mainstream, authoritarian, and traditional right. Meanwhile, fascism's seemingly inexorable rise unfolded against the backdrop of a dramatic shift towards dictatorship in large parts of Europe during the 1920s and especially 1930s. These dictatorships shared a growing conviction that 'fascism' was the driving force of a new, post-liberal, fiercely nationalist and anti-communist order. The ten contributions to this volume seek to capture, theoretically and empirically, the complex transnational dynamic between interwar dictatorships. This dynamic, involving diffusion of ideas and practices, cross-fertilisation, and reflexive adaptation, muddled the boundaries between 'fascist' and 'authoritarian' constituencies of the interwar European right.

Social movements have shaped and are shaping modern societies around the globe; this is evident when we look at examples such as the Arab Spring, Spain’s Indignados and the wider Occupy movement. In this volume, experts analyse the ‘classic’ and new social movements from a uniquely global perspective and offer insights in current theoretical discussions on social mobilisation. Chapters are devoted both to the study of continental developments of social movements going back to the nineteenth century and ranging to the present day, and to an emphasis on the transnational dimension of these movements. Interdisciplinary and truly international, this book is an essential text on social movements for historians, political scientists, sociologists, philosophers and social scientists.

Many of the foremost experts in the study of European fascism unite to provide a contemporary analysis of the theories and historiography of fascism. Essays discuss the most recent debates on the subject and how changes in the social sciences over the past forty years have impacted on the study of fascism from various perspectives.

On the tracks of the killers of Rosa Luxemburg The cold-blooded murder of revolutionary icons Rosa Luxemburg and Karl Liebknecht in the pitched political battles of post-WWI Germany marks one of the greatest tragedies of the 20th century. No other political assassination inflamed popular passions and transformed Germany's political climate as that killing in the night of 15-16 January 1919 in front of the luxurious Hotel Eden. It not only cut short the lives of two of the country's most brilliant political leaders, but also inaugurated a series of further political assassinations designed to snuff out the revolutionary flame and, ultimately, pave the way for the ultra-reactionary forces that would take power in 1933. To commemorate the 100th anniversary of their untimely deaths, Klaus Gietinger has carefully reconstructed the events on that fateful night, digging deep into the archives to identify who exactly was responsible for the murder, and what forces in high-placed positions had a hand in facilitating it and protecting the culprits.

English summary: The authors analyse how political ideologies are represented in the discourses, visions, programmes and propagandistic efforts of extremist organisations. While some explore characteristic differences and similarities between right and left extremists, others use political-religious fundamentalism as an object of comparison. German description: Die Autoren des Bandes setzen sich mit dem Niederschlag politischer Ideologien in den Diskursen, Visionen, Programmen und propagandistischen Bemuhungen extremistischer Organisationen auseinander. Die Beitrager erfassen differenziert die charakteristischen Unterschiede und Gemeinsamkeiten der rechten und linken Extremismen, nutzen aber auch den politisch-religiosen Fundamentalismus als Vergleichsobjekt. Trotz einer Pluralitat der Sichtweisen ist allen Autoren eine Definition von Extremismus gemeinsam, die sich aus der Negation von Demokratie herleitet. So geraten auch weiche Formen von Extremismus in den Blick, die mit dem harten Extremismus Gemeinsamkeiten aufweisen, ohne alle seine Merkmale zu erfullen.

This volume aims to provide a new framework for the analysis of securitization processes, increasing our understanding of how security issues emerge, evolve and dissolve. Securitisation theory has become one of the key components of security studies and IR courses in recent years, and this book represents the first attempt to provide an integrated and rigorous overview of securitization practices within a coherent framework. To do so, it organizes securitization around three core assumptions which make the theory applicable to empirical studies: the centrality of audience, the co-dependency of agency and context and the structuring force of the dispositif. These assumptions are then investigated through discourse analysis, process-tracing, ethnographic research, and content analysis and discussed in relation to extensive case studies. This innovative new book will be of much interest to students of securitisation and critical security studies, as well as IR theory and sociology. Thierry Balzacq is holder of the Tocqueville Chair on Security Policies and Professor at the University of Namur. He is Research Director at the University of Louvain and Associate Researcher at the Centre for European Studies at Sciences Po Paris.

Fascist Ideology is a comparative study of the expansionist foreign policies of fascist Italy and Nazi Germany from 1922-1945. Fascist Ideology provides a comparative investigation of fascist expansionism by focusing on the close relations between ideology and action under Mussolini and Hitler. With an overview of the ideological motivations behind fascist expansionism and their impact on fascist policies, this book explores the two main issues which have dominated the historiographical debates on the nature of fascist expansionism: whether Italy's and Germany's particular expansionist tendencies can be attributed to a set of generic fascist values, or were shaped by the long term, uniquely national ambitions and developments since unification; whether the pursuit of expansion was opportunistic or followed a grand design in each case.
