It was the most brutal corporate restructuring in Wall Street history. The 2015 bankruptcy brawl for the storied casino giant, Caesars Entertainment, pitted brilliant and ruthless private equity legends against the world's most relentless hedge fund wizards. In the tradition of Barbarians at the Gate and The Big Short comes the riveting, multi-dimensional poker game between private equity firms and distressed debt hedge funds that played out from the Vegas Strip to Manhattan boardrooms to Chicago courthouses and

Read Book Doent Acer Aspire X1700

even, for a moment, the halls of the United States Congress. On one side: Apollo Global Management and TPG Capital. On the other: the likes of Elliott Management, Oaktree Capital, and Appaloosa Management. The Caesars bankruptcy put a twist on the old-fashioned casino heist. Through a \$27 billion leveraged buyout and a dizzying string of financial engineering transactions, Apollo and TPG—in the midst of the post-Great Recession slump—had seemingly snatched every prime asset of the company from creditors, with the notable exception of Caesars Palace. But Caesars' hedge fund lenders and bondholders had scooped up the company's paper for nickels and dimes. And with their own armies of lawyers and bankers, they were ready to do everything necessary to take back what they believed was theirs—if they could just stop their own infighting. These modern financiers now dominate the scene in Corporate America as their fight-to-the-death mentality continues to shock workers, politicians, and broader society—and even each other. In *The Caesars Palace Coup*, financial journalists Max Frumes and Sujeet Indap illuminate the brutal tactics of distressed debt mavens—vultures, as they are condemned—in the sale and purchase of even the biggest companies in the world with billions of dollars hanging in the balance.

Display technology is evolving at an impressive rate with LCD and flat panel technologies gaining an increasing market share over traditional CRT display applications. Focusing on the development of new industry standards, this timely exposition of display systems and applications covers display timings, interfaces, specifications, measurement procedures and all forms of display control and identification. Reviews interface and graphics subsystem standards, including FPDI (Flat Panel Display

Interface), P&D (Plug and Display) and Intel's Digital Video Interface (DVI) Compares and contrasts current and future developments of television and computer industry standards Describes the major new display system applications (HDTV, notebook computer, cellphone, cockpit instrumentation etc) and illustrates how user needs have dictated technological requirements (eg power, size and bistability) Provides an accessible treatment of current and future display device development, including guidance on selecting devices for particular applications Designed to meet the needs of professionals using and implementing display technologies and as a reference for those developing new display systems, this text is a valuable resource for display technology developers and system integrators, video graphics interface engineers and professionals. The comprehensive coverage of this leading edge topic makes it also of interest to postgraduate students in Computer Science and Electrical Engineering. The Society for Information Display (SID) is an international society, which has the aim of encouraging the development of all aspects of the field of information display. Complementary to the aims of the society, the Wiley-SID series is intended to explain the latest developments in information display technology at a professional level. The broad scope of the series addresses all facets of information displays from technical aspects through systems and prototypes to standards and ergonomics

In this insightful book, you'll learn from the best data practitioners in the field just how wide-ranging -- and beautiful -- working with data can be. Join 39 contributors as they explain how they developed simple and elegant solutions on projects ranging from the Mars lander to a Radiohead video. With *Beautiful Data*, you will: Explore the

opportunities and challenges involved in working with the vast number of datasets made available by the Web Learn how to visualize trends in urban crime, using maps and data mashups Discover the challenges of designing a data processing system that works within the constraints of space travel Learn how crowdsourcing and transparency have combined to advance the state of drug research Understand how new data can automatically trigger alerts when it matches or overlaps pre-existing data Learn about the massive infrastructure required to create, capture, and process DNA data That's only small sample of what you'll find in Beautiful Data. For anyone who handles data, this is a truly fascinating book. Contributors include: Nathan Yau Jonathan Follett and Matt Holm J.M. Hughes Raghu Ramakrishnan, Brian Cooper, and Utkarsh Srivastava Jeff Hammerbacher Jason Dykes and Jo Wood Jeff Jonas and Lisa Sokol Jud Valeski Alon Halevy and Jayant Madhavan Aaron Koblin with Valdean Klump Michal Migurski Jeff Heer Coco Krumme Peter Norvig Matt Wood and Ben Blackburne Jean-Claude Bradley, Rajarshi Guha, Andrew Lang, Pierre Lindenbaum, Cameron Neylon, Antony Williams, and Egon Willighagen Lukas Biewald and Brendan O'Connor Hadley Wickham, Deborah Swayne, and David Poole Andrew Gelman, Jonathan P. Kestellec, and Yair Ghitza Toby Segaran

This practical, hands-on guide addresses the problems and difficult choices that professional compositors face on a daily basis. You are presented with tips, techniques, and solutions for dealing with badly shot elements, color artifacts, mismatched lighting and other commonly-faced compositing obstacles. Practical, in-depth lessons are featured for bluescreen matte extraction, despill operations, compositing operations, as well as color-correction. The book is presented entirely in an application-agnostic

Read Book Doent Acer Aspire X1700

manner, allowing you to apply lessons learned to your compositing regardless of the software application you are using. The DVD contains before and after examples as well as exercise files for you to refine your own techniques on. New to the 3rd edition is an entirely new chapter entitled 'CGI Compositing Techniques', covering how the modern CGI production pipeline is now pushing many tasks that used to be done in the 3D department into the compositing department. All technological changes that have occurred between now and the publication of the 2nd edition are covered, as well as new media on the DVD and corresponding lessons within the book.

The three pieces in Idaho Gems capture the spirit of this northwestern state. "White Pine Waltz" begins with a delicate melody in 3/4 meter inspired by the majestic western white pine, Idaho's state tree. The piece builds to a climactic middle section featuring flowing arpeggios in both hands before subsiding into a restatement of the theme. The second piece, "Craters of the Moon," paints a picture of the volcanic landscapes found in the national preserve of the same name. A repetitive chromatic figure in the lower register is combined with dissonant intervals in the upper register to capture the eerie otherworldliness of the park's lava fields. In "Snake River Rag," chromatic passages wind their way across the keyboard, inspired by the Snake River's twisted path through the Idaho countryside. "Western Gem" provides a dynamic conclusion to the suite. The piece makes full use of the keyboard with block chords and scalar passages in both hands, while a modulation in the middle section provides an additional musical challenge.
