Bringing together a distinguished cast of contributors, the book provides an authoritative and definitive analysis of the theory, practice and development impact of corruption in Africa. Combating corruption is demonstrated to require greater priority in the quest for African development.

The 98-381: Introduction to Programming Using Python is a Python certification from Microsoft. The certification is meant for candidates who can: Recognize the various data types in Python Understand and modify existing Python code Write syntactically correct Python code Upon successful completion of the Microsoft Python certification examination, the candidates are awarded the MTA (Microsoft Technical Associate) credential. An MTA 98-391 certified individual can work with Python on a professional level and is ready to explore the advanced aspects of the high-level, general-purpose programming language and related technologies. Exam Details Name – Introduction to Programming Using Python Code – 98-381 Duration – 45 minutes Language(s) – Chinese (Simplified), Chinese (Traditional), English, French, German, Japanese, Korean, Portuguese (Brazil), and Spanish Level – Associate Passing Percentage – 70% Prerequisites – 100+ hours of instruction/hands-on experience in the Python programming language, familiarity with the capabilities and features of Python, ability to understand, write, debug, and maintain well documented Python code Price – \$127 Total Questions – 40 Type – Drag & drop, a selection from the drop-down list, single-choice and multiple-choice questions Syllabus Data and data type operations Document and structure code Error handling Input and output operations Python conditional statements and looping Python modules and tools Now that you know what the best certifications are, it ' s time to prepare for them. How to do that? You need to go through the syllabus, practice, read as much as possible about Python, and much more. You can, however, also take Python certification practice tests to ensure that you ' re certification-ready without overindulging yourself in preparation for clearing the Python certification exam.

The focus of this publication is on answering the central research question: How can Human Rights be advanced with regard to different kinds of diversities, and in different educational settings? The publication pays special attention to the advancement of human rights in a variety of education-related contexts, in keeping with human rights as a declared national priority for both society at large and the education system. One strategic priority of the Faculty of Education is research based on market requirements and needs. This book strives towards meeting this expectation by directly aiming at building human rights and social justice in the South African society, public schools and higher education institutions. Adjudication in the education context of the constitutional values of dignity, equality and freedom focusses regularly on learners. The book highlights the value of education for full-fledged citizenship by delineating what schooling should entail to inspire learners towards both claiming equal freedoms and rights and taking accountability for the responsibilities attached to citizenship.

Over the past decade, DR Congo and South Africa have attracted global attention for high rates of sexual and gender-based violence. Why is it that courts in eastern DR Congo have offered a robust judicial response, prioritizing gender crimes despite considerable logistical challenges, whilst courts in South Africa, home to a far stronger legal infrastructure and human rights record, have failed to provide justice to victims of similar crimes? Lake shows that state fragility in DR Congo has created openings for human rights NGOs to influence legal processes in ways that have proved impossible in countries like South Africa, where the state is stronger. Yet exploiting opportunities presented by state fragility to pursue narrow human rights goals invites a host of new challenges. Strong NGOs and Weak States documents the promises and pitfalls of human rights and rule of law advocacy undertaken by NGOs in strong and weak states alike.

The Early Grade Reading Assessment (EGRA) measures students' progress towards reading. EGRA gauges early literacy skills through a 15-minute individual oral assessment of five fundamental reading skills. RTI worked with education experts to develop the EGRA in 2006, and it has been piloted and implemented in more than 40 countries. This volume aims to take stock of the substantial amount of information and experience generated through the use of EGRA, and to share this knowledge with practitioners, policymakers, and international donors. Chapters cover not only particular applications of the instrument but also put EGRA in the context of broader issues and developments in literacy and education.

Exploring the capacity and impact of decentralization within European health care systems, this book examines both the theoretical underpinnings as well as practical experience with decentralization.

This book presents a collection of different researches and results on "e-learning". The chapters cover the deficiencies, requirements, advantages and disadvantages of e-learning and distance learning. So, the authors reported their research and analysis results on "e-learning" according to their areas of expertise.

This book, Teaching Learners with Visual Impairment, focuses on holistic support to learners with visual impairment in and beyond the classroom and school context. Special attention is given to classroom practice, learning support, curriculum differentiation and assessment practices, to mention but a few areas of focus covered in the book. In this manner, this book makes a significant contribution to the existing body of knowledge on the implementation of inclusive education policy with learners affected by visual impairment.
