has gained increased international attention in recent years. In response to market need, BSI has now published BS 8001:2017, the first standard to help improve understanding and implementation of the circular economy at an organizational level.

Executive Briefing: BS 8001 - a Guide - edie.net

BS 8001 - A new standard is available. Our current economic model is dominated by a linear approach to consumption and production, where materials are grown or extracted, then made into goods which are used and then disposed of. Whilst the circular economy – where resources are recovered at their highest quality and kept in circulation for as long as possible – is not a new concept, it has become increasingly

BS 8001 Circular Economy - Webinar | BSI

We've already developed a number of standards that support waste prevention, resource efficiency, eco-design and remanufacturing. Although there is no one standard focussed entirely on the concept of the circular economy and resource management, BS 8001 provides a framework and guidance on how to explore the practicalities for your organization.

Sustainability and circular economy | BSI

The BS 8001 circular economy framework guidance highlights six primary principles that underline circular economy thinking. They are: Systems thinking. Understanding how what you do impacts things system-wide.
