This edition of Importing Into the United States contains material pursuant to the Trade Act of 2002 and the Customs Modernization Act, commonly referred to as the Mod Act. Importing Into the United States provides wide-ranging information about the importing process and import requirements. We have made every effort to include essential requirements, but it is not possible for a book this size to cover all import laws and regulations. Also, this publication does not supersede or modify any provision of those laws and regulations. Legislative and administrative changes are always under consideration and can occur at any time. Quota limitations on commodities are also subject to change. Therefore, reliance solely on the information in this book may not meet the "reasonable care" standard required of importers.

This book offers a creative and illuminating discussion of Protestant theology. Veteran teacher Phillip Cary explains how Luther's theology arose from the Christian tradition, particularly from the spirituality of Augustine. Luther departed from the Augustinian tradition and inaugurated distinctively Protestant theology when he identified the gospel that gives us Christ as its key concept. More than any other theologian, Luther succeeds in carrying out the Protestant intention of putting faith in the gospel of Christ alone. Cary also explores the consequences of Luther's teachings as they unfold in the history of Protestantism.
