Fundamentals of Optics: White, Harvey E., Jenkins, Francis ...

Optics deals with light waves, which are electromagnetic waves. Electromagnetic waves include not only light waves, but also ordinary alternating current at 60Hz, radio waves, microwaves, infrared, X-rays and γ -rays. Electromagnetic waves obey Maxwell's equations, which are introduced in Sect. 2.1, which also treats the electromagnetic wave equation followed by the plane-wave solution in homogeneous, linear isotropic space.
