Written for Tusculum College students, this guidebook will help you to navigate the often-confusing and tangled paths of academic writing. From your freshman composition sequence through your senior seminar course, you should plan to use the strategies taught in this book to complete a variety of writing assignments including rhetorical analyses, standard arguments, research papers, annotated bibliographies, and proposals. Each chapter will walk you through the steps necessary to navigate these different writing types. Additionally, you will be introduced to the writing process, including methods of prewriting, drafting, revising, and editing. This process will help you in any kind of writing you undertake.

The two-volume set LNCS 9981 and 9982 constitutes the refereed proceedings of the 15th International Semantic Web Conference, ISWC 2016, which was held in Kobe, Japan, in October 2016. The 75 full papers presented in these proceedings were carefully reviewed and selected from 326 submissions. The International Semantic Web Conference is the premier forum for Semantic Web research, where cutting edge scientific results and technological innovations are presented, where problems and solutions are discussed, and where the future of this vision is being developed. It brings together specialists in fields such as artificial intelligence, databases, social networks, distributed computing, Web engineering, information systems, human-computer interaction, natural language processing, and the social sciences. The Research Track solicited novel and significant research contributions addressing theoretical, analytical, empirical, and practical aspects of the Semantic Web. The Applications Track solicited submissions exploring the benefits and challenges of applying semantic technologies in concrete, practical applications, in contexts ranging from industry to government and science. The newly introduced Resources Track sought submissions providing a concise and clear description of a resource and its (expected) usage. Traditional resources include ontologies, vocabularies, datasets, benchmarks and replication studies, services and software. Besides more established types of resources, the track solicited submissions of new types of resources such as ontology design patterns, crowdsourcing task designs, workflows, methodologies, and protocols and measures.

This book constitutes the refereed proceedings of the 4th International Conference on Recent Developments in Science, Engineering and Technology, REDSET 2017, held in Gurgaon, India, in October 2017. The 66 revised full papers presented were carefully reviewed and selected from 329 submissions. The papers are organized in topical sections on big data analysis, data centric programming, next generation computing, social and web analytics, security in data science analytics.

The author describes and explains the syntactic and pragmatic properties of the nominal and pronominal elements in sentences of the types Ces Romains ils sont fous and Ils sont

fous, ces Romains, which, in spite of their frequent occurrence, have so far received little attention among linguists and grammarians. He argues that far from having the marginal status of a linguistic anomaly, the cooccurrence in the same clause of coreferential nouns and pronouns is one formal manifestation of an important functional principle in modern French: the encoding of a topic-comment relationship in the surface structure of the sentence. The pronouns in sentences such as the ones mentioned are interpreted as agreement markers. The syntactic and semantic differences between topics and anti-topics are analyzed.

This handbook provides a comprehensive overview of state-of-the-art, innovative approaches to qualitative research for organizational scholars. Individual chapters in each area are written by experts in a variety of fields, who have contributed some of the most innovative studies themselves in recent years. An indispensable reference guide to anyone conducting high-impact organizational research, this handbook includes innovative approaches to research problems, data collection, data analysis and interpretation, and application of research findings. The book will be of interest to scholars and graduate students in a wide variety of disciplines, including anthropology, organizational behavior, organizational theory, social psychology, and sociology
