## **IEC 60068-2:2020 SER | IEC Webstore**

IEC 60068 is a collection of methods for environmental testing of electronic equipment and products to assess their ability to perform under environmental conditions including extreme cold and dry heat. IEC 60068 offers appropriate severities and prescribes various environmental conditions for measurements and tests. IEC 60068 has three parts:

## **IEC 60068 - Wikipedia**

IEC 60068-2-78:2012 is available as IEC Standards+ 60068-2-78:2012 which contains the International Standard and its Redline version, showing all changes of the technical content compared to the previous edition. IEC 60068-2-78:2012 establishes a test method for determining the ability of components or equipment to withstand transportation, storage and use under conditions of high humidity.

## **IEC 60068-2-78:2012 | IEC Webstore**

patent rights. IEC shall not be held responsible for identifying any or all such patent rights. International Standard IEC

60068-2-30 has been prepared by IEC technical committee 104: Environmental conditions, classification and methods of test. This third edition cancels and replaces the second edition (1980) and its amendment 1 (1985),

## **INTERNATIONAL IEC STANDARD 60068-2-30**

IEC 60068-2-78:2012 establishes a test method for determining the ability of components or equipment to withstand transportation, storage and use under conditions of high humidity. The object of this standard is to investigate the effect of high humidity at constant temperature without condensation on a specimen over a prescribed period.
