This book offers rich critical perspectives on the marketing of a variety of toys, brands, and product categories. Topics include marketing undertaken by specific children 's toy brands such as American Girl, Barbie, Disney, GoldieBlox, Fisher-Price, and LEGO, and marketing trends characterizing broader toy categories such as on-trend grotesque toys; toy firearms; minimalist toys; toyetics; toys meant to offer diverse representation; STEM toys; and unboxing videos. Toy marketing warrants a sustained scholarly critique because of toys ' cultural significance and their roles in children 's lives, as well as the industry 's economic importance. Discourses surrounding toys—including who certain toys are meant for and what various toys and brands can signify about their owners ' identities—have implications for our understandings of adults ' expectations of children and of broader societal norms into which children are being socialized.

This book is a collection of short stories that cover a large portion of my life. It was not meant to be a biographical journal, though it is my life. But, it was written as one would in the pursuit of adventure and discovery. I only included the more entertaining parts that I think might be of interest to the reader. It starts with a wild and feral childhood which allowed for many mistakes to be achieved. This allowed me to gain an early understanding of action and reaction situations. Growing up was sometimes tough and cruel, but it also had its moments of exploration and discovery with monumental episodes of sheer delight as seen only from young innocent eyes.Later I give a firsthand accounting of an over-the-road truck driver. Many have wondered about the life one must live to follow the 24-hour, seven days a week grind of driving across the country for a living. I give a fairly enlightening representation of that lifestyle in the second half of the book.
