As of the third edition, this textbook is published exclusively by the MIT Press. Some books on algorithms are rigorous but incomplete; others cover masses of material but lack rigor. Introduction to Algorithms uniquely combines rigor and comprehensiveness.

Introduction to Algorithms 3rd Edition solutions manual  
Selecting  $c_2 = 1$  clearly shows the third inequality since the maximum must be smaller than the sum.  $c_1$  should be selected as  $1/2$  since the maximum is always greater than the weighted average of  $f(n)$  and  $g(n)$ . Note the significance of the "asymptotically nonnegative" assumption. The first inequality could not be satisfied otherwise. 3:1-4
