Put simply,
candlesticks are a
way of
communicating
information about
how price is moving
relative to time.

Specifically, candles

reveal four pieces of information for each time period: the open price for that time period, the close price, the high, and the low. For instance, on a daily chart, each candle constitutes one day's worth of price activity.

The hammer and the inverted hammer candlestick patterns are among the most popular trading formations. Both are reversal patterns, and they occur at the bottom of a downtrend. Structure

The hammer pattern is a single-candle bullish reversal pattern that can be

Reversal patterns are the opposite of continuation candlestick patterns.

While the latter signal that the prevailing trend is likely to continue after a temporary pause is finished and the breakout is confirmed, reversal patterns are pointing towards an

impending change in the trend direction. Also, reversal patterns need more time to form than the continuation formations as it is easier for the market to continue in the same direction than change its course.
