The microKORG's arpeggiator lets you produce an arpeggio simply by holding down a chord.
You can choose from six arpeggio types, and adjust the duration and spacing of the
arpeggiated notes. You can also specify whether a note will be on or off for each of up to
eight steps, letting you create a broad range of modified rhythms and other effects.

Arpeggiator Using the arpeggiator The arpeggiator is a function that automatically arpeggiates the notes of a chord you play; i.e., sounds the notes one after the other. The microKORG's arpeggiator provides six types of arpeggio pattern, and lets you adjust the duration (gate time) of the notes that are sounded. Page 18: Editing

The Korg Microkorg is a very deceptive looking synthesiser. Why? Well, it shares the same architectural design as the Korg MS2000 but wrapped up in a highly portable unit that omits most of the hands-on controls, it can even be run on batteries like the Roland Boutique series of today the Microkorg should not be underestimated in its capabilities. ...
