Episode 1 : [Le guide du voyageur galactique de Douglas Adams]

H2G2 : Le guide du voyageur galactiqueLE GUIDE DU VOYAGEUR GALACTIQUE—Douglas Adams the answer to life, universe and everything

Comment garder tout son flegme quand on apprend dans la même journée : que sa maison va être abattue dans la minute pour laisser place à une déviation d'autoroute ; que la Terre va être détruite d'ici deux minutes, se trouvant, coïncidence malheureuse, sur le tracé d'une future voie express intergalactique ; que son meilleur ami, certes délicieusement décalé, est en fait un astroppeur natif de Bételgeuse et s'apprête à vous entraîner aux confins de la galaxie? Pas de panique! Car Arthur Dent, un Anglais extraordinairement moyen, pourra compter sur le fabuleux Guide du voyageur galactique pour l'accompagner clans ses extraordinaires dérapages spatiaux moyennement contrôlés.

This beautifully illustrated edition of the New York Times bestselling classic celebrates the 42nd anniversary of the original publication—with all-new art by award-winning illustrator Chris Riddell. SOON TO BE A HULU SERIES • "An astonishing comic writer."—Neil Gaiman Nominated as one of America’s best-loved novels by PBS’s The Great American Read It’s an ordinary Thursday morning for Arthur Dent . . . until his house gets demolished. The Earth follows shortly after to make way for a new hyperspace express route, and Arthur’s best friend has just announced that he’s an alien. After that, things get much, much worse. With just a towel, a small yellow fish, and a book, Arthur has to navigate through a very hostile universe in the company of a gang of unreliable aliens. Luckily the fish is quite good at languages. And the book is The Hitchhiker’s Guide to the Galaxy . . . which helpfully has the words DONT PANIC inscribed in large, friendly letters on its cover. Douglas Adams’s mega-selling pop-culture classic sends logic into orbit, plays havoc with both time and physics, offers up pithy commentary on such things as ballpoint pens, potted plants, and digital watches . . . and, most important, reveals the ultimate answer to life, the universe, and everything. Now, if you could only figure out the question. . . .

Comment garder tout son flegme quand on apprend dans la même journée : que sa maison va être abattue dans la minute pour laisser place à une déviation d'autoroute ; que la Terre va être détruite d'ici deux minutes, se trouvant, coïncidence malheureuse, sur le tracé d'une future voie express intergalactique ; que son meilleur ami, certes délicieusement décalé, est en fait un astroppeur natif de Bételgeuse et s'apprête à vous entraîner aux confins de la galaxie ? Pas de panique ! Car Arthur Dent, un Anglais extraordinairement moyen, pourra compter sur le fabuleux Guide du voyageur galactique pour l'accompagner dans ses extraordinaires dérapages spatiaux moyennement contrôlés. Avant d'être la série de SF humoristique la plus vendue au monde, H2G2 était un feuilleton radiophonique, douze épisodes de trente minutes, diffusé à la BBC en 1978 et 1980.

Plus bas que Terre ! Ayant - plus ou moins - survécu à son édifiante promenade cosmo-temporelle, le pauvre Arthur Accroc savoure l'indicible plaisir de fouler à nouveau le sol de sa planète natale. Une planète jadis détruite par les terribles Vogons, sous le prétexte fallacieux de laisser passer une autoroute intergalactique... Pas de panique ! Car l'universellement exhaustif Guide galactique saura sans doute répondre à cet étrange paradoxe. Et peut-être élucidera-t-il un mystère plus angoissant encore : pourquoi les dauphins ont-ils disparu, laissant pour ultime message un laconique Salin et encore merci pour le poisson ?

The relationship between technological and pedagogical innovation has recently created a new field of research at the crossroads between Psychology, Educational Sciences and Artificial Intelligence: Educational Robotics (ER). Through analysis of the achievable educational goals based on the technological status and specific learning modes of different types of robots, it is possible to define three pedagogical paradigms: learning robotics, learning with robotics, and learning by robotics. In this book we address these three paradigms through three themes: human representations of robots, the acceptance and trust shown when interacting with a humanoid, and learning favored by the development and programming of robots in an educational context. These themes allow the authors to fully explore, define and delimit this novel field of research for future application in educational and social contexts. Finally, the book discusses contributions and limitations which have emerged from different methodologies of research, potential educational applications, and concepts of human–robot interaction for the development of the above paradigms.

THEY WERE GREEN, THEY WERE LITTLE, THEY WERE BALD AS BILLIARD BALLS AND THEY WERE EVERYWHERE! Luke Devereaux was a science fiction writer, holed up in a desert shack waiting for inspiration. He was the first to see a Martian - but he certainly wasn't the last. It was estimated that one billion of them had arrived - one to every three human beings on Earth. Obnoxious green creatures who could be seen and heard (but not harmed) and who probed private sex lives as shamelessly as they exposed government secrets. No one knew why they had come. No one knew how to make them go away - except perhaps, Luke Devereaux. Unfortunately he was going slightly bananas, so it wouldn't be easy. But for a science fiction writer nothing was impossible...

A biography of the creator of "The Hitchhiker's Guide to the Galaxy" focuses on Adams's interests and influences, which include Monty Python, Dr. Who, and the Beatles, as well as his numerous famous friendships.
