Lev Vygotsky was one of the most talented and brilliant of Soviet psychologists. Despite his tragically early death at the age of 38 his accomplishments are enormously impressive: he played a key role in restructuring the Psychological Institute of Moscow; set up two research laboratories in the major cities of the USSR; founded what we call special education; and authored some 180 works.

It presented Vygotsky as a Marxist methodologist, both locating him in his historical period and delineating how his life and writings have been a catalyst for a contemporary revolutionary, practical-critical, psychology. It highlighted Vygotsky's unconventional view of how development and learning are related and, in doing so, brought human development into prominence.
