growth, mother plants, cloning, flowering, harvesting and curing, diseases, pests and hash making. More than 1100 full colour photos and drawings illustrate every detail and numerous simple cultivation solutions make for easy appeal to novice growers. Readers will learn how to achieve the highest, most potent yields, even with limited space and budget.

Esta es una excelente guía para principiantes y profesionales en el cultivo en interiores de marihuana para uso personal utilizando hidroponía y suelo. ¡Le brinda técnicas y métodos simples que necesita para tener un santuario próspero para sus plantas de cannabis y producir plantas con cogollos potentes y cantidades masivas de resinas! Cultivar su cannabis en interiores le brinda la oportunidad de controlar su crecimiento y realizar ajustes en las condiciones ambientales que estimularán significativamente el crecimiento de la planta. También es una vía para prevenir plagas que vienen junto con el cultivo al aire libre. ¿Busca tener un conocimiento básico que se pueda aprovechar para cultivar grandes plantas? ¡Entonces este es el libro para usted! Las partes mayores y menores que participan en el cultivo de cannabis se tratan a fondo. Desde el diseño y el tipo de espacio del santuario hasta el tipo de nutrientes, de la iluminación a la temperatura, del control de plagas al flujo de aire. Todo lo que necesita para cultivar potentes variedades de marihuana está a tu alcance. Cada etapa del cultivo, desde la obtención de las semillas hasta el secado y el curado, se explica completamente en términos que usted puede entender fácilmente y para que pueda poner en práctica de inmediato. Entonces, ¿desea dar los primeros pasos para nutrir esta hermosa planta desde la semilla hasta una potente maravilla de la naturaleza? Este libro le enseñará cómo: Crecer su reserva mientras emplea altos estándares de seguridad Aprender a asegurar un espacio de crecimiento discreto en un área confinada Ser capaz de determinar la potencia de su producto Floración forzada Aplicar las mejores fórmulas de nutrientes a tus plantas Cruza e

offering illuminating insights into frequently-encountered - and intriguingly rare - dope growing difficulties.

Hello dear readers, respectively future growers! In this book I will explain to you exactly how you can grow cannabis commercially with the most successful plant cultivation system ever under hydroponic systems and why the aeroponics system is the best in the world. Many growers do not dare to use the system because the internet often tells how complicated and vulnerable the system is but it is not so. I will convince you of the opposite and show you that this system is the simplest and best system and works very easy. I will explain to you how to set up a grow-room and what is important. What kind of equipment you need. What kind of marijuana is suitable for your projects, what kind of fertilizers and equipment you need and where you can buy it, what kind of light you need, how to properly prune, harvest and dry the plants. I will show you how to set up a 2 month cycle so that you can harvest monthly, depending on how much you want to harvest or what area you have available. In this book we make together an example Grow with two 600 watt lamps and two small aeroponics systems each 1 square meter large, the goal is to harvest over 700 grams dry every month. In a nutshell, with me at your side you have a super assistant with decades of grow experience. I will explain everything in this book so clearly and in such detail that you can't make any mistakes when growing with aeroponics, because you don't have to be a botanist to successfully grow with an aeroponics system, you just need the know-how from this book. Do you want to grow with the best efficient system and commercially? Then let's not waste any time - let's get going!
