When handling volatile organic compounds (VOC), seal selection is often determined by specific gravity and maxi-mum allowable emission levels. Lower specific gravity products, combined with parts per million VOC emissions allowable, dictate not only if a mechanical seal is required, but also if double mechanical seals are required. Federal

Mechanical Seals Technical Manual

• The mechanical seal faces are obviously the most critical sealing point of a mechanical seal assembly. • Although the faces can be manufactured from a myriad of different materials, one is typically carbon, while the other is usually a hard material.
