This book comprises selected papers from the Fourth International Conference on Materials and Manufacturing Engineering (ICMME 2019). The contents focus on the latest developments in the synthesis and characterization of new materials, and highlights the challenges involved in the manufacturing and machinability of different materials. Advanced and cost-effective manufacturing processes and their applications are also discussed in the book. In addition, it covers topics like robotics, fluid dynamics, design and development, and different optimization techniques. The contents of this book will be beneficial to students, researchers, and industry professionals.

Marco Armiero is Senior Researcher at the Italian National Research Council and Marie Curie Fellow at the Institute of Environmental Sciences and Technologies, Universitat Aut(noma de Barcelona. He has published extensively on-Italian environmental history and edited Views from the South: Environmental Stories from the Mediterranean World. --

A practical, bipartisan call to action from the world's leading thinkers on the environment and sustainability Sustainability has emerged as a global priority over the past several years. The 2015 Paris Agreement on climate change and the adoption of the seventeen Sustainable Development Goals through the United Nations have highlighted the need to address critical challenges such as the buildup of greenhouse gases in the atmosphere, water shortages, and air pollution. But in the United States, partisan divides, regional disputes, and deep disagreements over core principles have made it nearly impossible to chart a course toward a sustainable future. This timely new book, edited by celebrated scholar Daniel C. Esty, offers fresh thinking and forward-looking solutions from environmental thought leaders across the political spectrum. The book's forty essays cover such subjects as ecology, environmental justice, Big Data, public health, and climate change, all with an emphasis on sustainability. The book focuses on moving toward sustainability through actionable, bipartisan approaches based on rigorous analytical research.

Read all about Clifford's BIG ideas! Classic Clifford reissued! It only takes a little to BE BIG! Emily Elizabeth taught Clifford good manners. He always says "please" and "thank you," follows the rules, and SHARES with his friends. It's easy to like someone like Clifford: even if he makes mistakes, he always tries to be kind and considerate. The BE BIG campaign invites everyone, big and small, to take action and raise awareness for how CLIFFORD'S BIG IDEAS can make the world a better place.

The well-known astronomer and astrobiologist surveys current knowledge of the development of intelligence on Earth in various forms of life and explains his persuasion that intelligence must have developed along similar lines throughout the universe

This publication offers a comprehensive look at the management of oaks in urban areas. As development moves into oak woodland areas, more and more oaks are becoming "urban" oaks. Oaks are highly valued in urban areas for their aesthetic, environmental, economic and cultural benefits. However, significant impacts to the health and structural stability of oaks have resulted from urban encroachment. Changes in environment, incompatible cultural practices, and pest problems can all lead to the early demise of our stately oaks. Using this book you'll learn how to effectively manage and protect oaks in urban areas - existing oaks as well as the planting of new oaks. Three key areas are addressed: selection, care, and preservation. You'll learn how cultural practices, pest management, risk management, preservation during development, and genetic diversity can all play a role in preserving urban oaks. Arborists, urban foresters, landscape architects, planners and designers, golf course superintendents, academics, and Master Gardeners alike will find this to be an invaluable reference guide.

"If you take a pencil, you can draw two cats." But then what do the cats do? Full of exciting adventure and imagination, this surreal, charming counting book will take you on a journey that anyone can go on, if they take a pencil...

In this searing, authentic memoir, Elizabeth is hired to herd goats on a remote mountain farm in the South of France where she carves out a life for herself without heat, running water, or even a good grasp of French. Far from her younger life as a New England preppie and Oregon hippie, the challenges of farm work daunt her. She befriends an Australian shepherd, reflects on her spirituality, and muses on the man she left behind. As she grows stronger, Elizabeth faces her self-doubt while maintaining her humor, eking fun wherever she can. When tragedy strikes Elizabeth's adopted family, she summons belief in herself and becomes the leader they desperately need.

'Granny isn't feeling up to snuff today, ' says Red Riding Hood's mum, so Red Riding is on her way to the other side of the woods with a tasty custard pie in tow - that will cheer Granny right up. But, suddenly, an irresistably charming wolf appears and insists that Red Riding Hood be escorted to her granny's. Can you guess what happens next

Through the Pacific Northwest forests and along the rugged coastal shores of California, Dawn Again is a riveting memoir of exploration and survival. As a young girl, Doniga Markegard was thrown from her horse and knocked unconscious. She remembers an out-of-body experience that revealed to her the great mystery at the heart of life. In Dawn Again, she writes of the journey that experience sparked. At a wilderness immersion school, medicine people and wildlife trackers train her in indigenous ways. Her search for an authentic life takes her hitchhiking across the West and to Alaska, where she falls deeply in love with tracking wolves and the rigors of surviving in the wilderness. Doniga seeks a vision and discovers her purpose, only to find herself on a cattle ranch, falling in love and starting a family, and learning a new way to apply the deep, unshakeable lessons of the wild.
