Socket extension. Php comes with a socket extension which provide c-style socket functions and can be used to write socket programs. However the socket extension is not the only option to do socket programming in php. Another technique is to use streams, like file streams. First lets take a look at how the socket extension code looks like.

1. Create a socket. The socket function can be used to create a socket. In the following code example we shall create a tcp socket.

```
#!/usr/bin/perl -w use Socket; # For constants like AF_INET and SOCK_STREAM $proto = getprotobyname ('tcp'); #get the tcp protocol # 1. create a socket handle (descriptor) my ($sock); socket ($sock, AF_INET, SOCK_STREAM, $proto) or die $!;
```
