Our whole universe was in a hot, dense state. Then nearly 14 billion years ago... maybe nothing much happened because time is infinite.

Classical physics make time travel impossible. But what about ' timeless ' travel?

Earth might look like a sphere, but it's actually an "oblate spheroid" -- the planet is slightly squished, making the circumference of the equator bigger than the circumference through the poles.

The Earth's Equatorial Bulge Shapes the Planet's Physics
