degrees for 6 hours a day for 4 weeks. Week 1

Tibial Plateau Fracture Surgery Rehab Protocol & Recovery

In the first stage of rehabilitation from a tibial plateau fracture, your knee must be immobilized for six to eight weeks to allow your tibial plateau to heal. Stage 2 Once your tibial plateau has fused together, your cast or hard brace may be removed. This marks the end of the first stage of rehab and the beginning of the second.

Rehabilitation From Tibial Plateau Knee Surgery | Healthfully

Surgical treatment of a displaced tibial plateau fracture usually involves open reduction and

Read Book Rehabilitation Guidelines For Tibial

Internal fixation (ORIF) of the tibial plateau fracture. Open reduction refers to open surgery to realign the bones and internal fixation refers to fixation of screws and/or plates to hold the affected bones in place and to help support the fracture.
