HVAC DUCT CONSTRUCTION STANDARDS

The third edition of the HVAC Duct Construction Standards Metal and Flexible is intended primarily for commercial and institutional duct construction. This American National Standard (ANSI/SMACNA 006-2006) contains tables and details for constructing ductwork for " to 10" wg positive and negative pressures. This edition improves upon the second edition with expanded pressure class tables, separate tables for TDC/TDF construction and expanded tables for round duct construction including 6" wg ...

SMACNA HVAC Duct Construction Standards-Metal & Flexible ...

Content Description. The third edition of the HVAC Duct Construction Standards Metal and Flexible is intended primarily for commercial and institutional duct construction. The standard contains tables and details for constructing ductwork for ½" to 10" wg positive and negative pressures. This edition improves upon the second edition with expanded pressure class tables, separate tables for TDC/TDF construction and expanded tables for round duct construction including 6" wg positive ...

HVAC Duct Construction Standards - Metal and Flexible, 3rd ...

If the designer does not designate pressure class for duct construction on the contract drawings, the basis of compliance with the SMACNA HVAC Duct Construction Standards is as follows: 2" (500 Pa) w.g. for all ducts between the supply fan and variable volume control boxes and 1" (250 Pa) w.g. for all other ducts of any application.
