Author Elizabeth Meade Howard felt abruptly promoted to family elder after the death of her father, an adman, writer, teacher and her lifelong role model. When facing her own later years, Howard sought guidance from resourceful and resilient older men and women whom she admired for their imagination, adaptability and graceful aging. Some were famous. In 30 intimate and often moving interviews with journalists, poets, politicians, actors and artists, Howard reveals the lasting legacies of creative people in their 70s, 80s and beyond. Interspersed throughout the book are short chapters weaving together Howard's family story with insights gathered from scholars and scientists who have researched the aging process.

As they look forward to the New York City Marathon in which their friend Mr. B. will run, the Vanderbeeker children learn that one of their good friends is homeless.

Cartier in Motion' unravels the unique story of Cartier?s approach to watchmaking and design. Curated by Lord Norman Foster, the book explores the creativity of Cartier. Whilst telling the story of Cartier watchmaking and the invention of the modern wristwatch, Cartier in Motion explores the change in society at the turn of the 20th century. Amidst upheavals in art, architecture, travel and lifestyles, the traces of a new world could be seen.0.

An introductory text covering the important field of accelerator physics, including collision and beam dynamics, and engineering considerations for particle accelerators.

Frankie Fairy loves to learn about creepy crawly critters in her own backyard! Now that she's at a new school, she's excited to learn even more about them! Instead, she learns that the other fairy kids in class think she's the creepy one. Is Frankie really that scary? And if she is—is that really a bad thing? Maybe her creepy crawly friends can help her figure it out!

This college-level textbook summarizes the state of current knowledge in the rapidly expanding field of agroforestry. The book, organized into 25 chapters in six sections, reviews the developments in agroforestry during the past 15 years and describes the accomplishments in the application of biophysical (plant and soil related) and socioeconomic sciences to agroforestry. Although the major focus of the book is on the tropics, where the practice and potential of agroforestry are particularly promising, the developments in temperate zone agroforestry are also discussed. This text is recommended for students, teachers, and researchers in agroforestry, farming systems, and tropical land use.

This volume provides a broad overview of the latest achievements in scintillator development, from theory to applications, and aiming for a deeper understanding of fundamental processes, as well as the discovery and availability of components for the production of new generations of scintillation materials. It includes papers on the microtheory of scintillation and the initial phase of luminescence development, applications of the various materials, and development and characterization of ionizing radiation detection equipment. The book also touches upon the increased demand for cryogenic scintillators, the renaissance of garnet materials for scintillator applications, nano-structuring in scintillator development, development and applications for security, and exploration of hydrocarbons and ecological monitoring.
