ThreadX User Guide: Green Hills edition

The X-WARE IoT Platform was a suite of embedded development products from Express Logic that included ThreadX RTOS. The suite is now Azure RTOS, and ThreadX RTOS is now Azure RTOS ThreadX. The products have improved connectivity to Azure IoT Hub and Azure IoT Central and seamless access to the benefits of Azure IoT. We will continue to enhance the value that Azure RTOS brings to customers and to grow the ecosystem of partners.

Real Time Operating System (RTOS) | Microsoft Azure

This article explains how the sample code implements Azure RTOS components for devices. The sample code in the getting started guide uses the following Azure RTOS components: Azure ThreadX. Provides the core real-time operating system components for devices. Azure NetX Duo. Provides a full TCP/IP IPv4 and IPv6 network stack, and networking support integrated with ThreadX.

GUIX is the embedded graphical user interface (GUI) for ThreadX. GUIX provides a 2D runtime system (environment) for embedded applications running ThreadX. GUIX supports multiple display devices with a variety of screen resolutions and color depths. Many predefined graphical widgets are available.
